

## WE'RE LOOKING FOR:

# Employee in Application Technology in the activated carbon sector (m/f/d)

### What you will do for us:

- Thanks to your extensive knowledge in the field of activated carbon, you advise customers and colleagues from an application technology perspective and are always available as a sparring partner in the interests of the company's goals
- You are highly skilled in the use of activated carbon for the purification of liquid and/or gaseous phases
- In the laboratory and/or at the customer's site, you enjoy researching innovative solutions to problems that you and/or our customer have identified
- You see the development of planning concepts, system dimensioning and solutions using CarboTech products for the German and international market as a challenge
- You represent the company in terms of application technology at customers, congresses, associations and universities
- You are responsible for the entire REACH product management at ECHA, as well as all patents inhouse

### What you should bring with you:

- You have successfully completed an engineering degree in process engineering (plant construction and operation), environmental engineering (water and gas) or civil engineering (specializing in water management)
- Knowledge of Adsorption Technology – a doctorate degree in the field of Adsorption Technology is of advantage
- 2-3 years of professional experience in the above-mentioned field is required
- Practical experience in the laboratory, in operations and with customers, sense of responsibility, independent and structured way of working
- You have strong interpersonal and communication skills and see yourself as a service provider
- You have a strong team mentality - because we are only strong together
- You are willing to travel and feel comfortable in a demanding customer environment
- Good knowledge of the MS Office package (Excel, PowerPoint, Word)
- Very good knowledge of German and/or English (written and spoken)

### What do we offer:

- Competitive salary, 30 days paid vacation per year, Employer-funded pension
- High-quality and modern work equipment, also in the home office
- Parking in front of the door / Excellent public transport connections
- An exciting and responsible task in cooperation with a motivated team
- Flat hierarchies and quick decision-making
- The possibility of constant further development and room for your own ideas
- Complimentary water, coffee and fresh fruit at work

### Who we are:

The CarboTech Group, a company of the ICI Group, is a leading medium-sized supplier and producer of adsorbents used to keep the environment clean, primarily in chemical, water and wastewater treatment as well as in ventilation and air conditioning technology..
